## EDUCATION

### BSC, Information Systems

The Max Stern Yezreel Valley College  
10.2022 - Present

### Preparatory Math & Physics

Ort Braude college  
04.2021-10.2021

### Diploma, Software Engineer Technion

10.2018-12.2020

## SKILLS

- Frontend Development: (HTML, CSS, Tailwind, TypeScript, React, Storybook)
- Responsive Design
- Mobile Development (React Native, Firebase)
- Backend Development (RESTful API, GraphQL, Node.js, Express.js)
- Databases (Firebase, Redis, MongoDB, MySQL, PostgreSQL)
- Technical Support
- Agile Methodology and TDD Proficiency

## LANGUAGES

- ENGLISH
- HEBREW
- ARABIC

## ABOUT ME

With 3+ years in React development, I excel in front-end and am expanding my full-stack proficiency. Agile-focused, I prioritize UI/UX and contribute to seamless applications. I've built RESTful and GraphQL APIs. A team player with effective communication, I'm committed to advancing my full-stack skills for impactful contributions to development projects.

## WORK EXPERIENCE

Frontend & Backend Developer

05.2022-Present

**Altooro, Haifa - Startup**

In this job, I worked with agile and test-driven development (TDD) methodologies.

### Frontend Experience

- Developed new UIs and fixed defects, creating stable and maintainable codebases using Next.js.
- Skilled in Git for version control, testing, and debugging.
- Crafted modular and responsive templates using modern CSS and JavaScript libraries.
- Proficient with HTML, CSS, TypeScript, React, SWR, MaterialUI, and Styled Components.
- Implemented mobile-friendly pages, enhancing UX and increasing dwell time.
- Documented all product components in Storybook.
- Optimized RAM usage in complex logic and functioning pages, reducing unnecessary re-renders.
- Integrated AWS Cognito with various providers (Google, Facebook) alongside classic email/password logins.

### Backend Experience

- Maintained stable codebases using Node.js and Express.
- Utilized databases like DynamoDB and RDS for efficient data management.
- Implemented RESTful services, improving system scalability and maintainability.
- Collaborated with frontend teams to deliver seamless user experiences.

Mobile Developer

01.2022 - 05.2022

**Loop, Haifa**

- Developed cross-platform mobile app using React Native and Firebase
- Implemented phone number authentication, SMS invitations, chat system, search engine, push notifications, and task management
- Followed agile methodology and test-driven development (TDD) practices
- Handled project management, weekly client updates, time estimation, and technical services

## PROJECTS

### [Expenses-Tracker](#)

- The final diploma project is a wood storage program developed in C# & Access Database. It helps sort and track wood in the store by matching available storage to the wood that needs sorting.
- Developed a C program that allows users to select and generate geometric shapes (e.g., square, triangle, etc.) composed of asterisks. Implemented features to save generated shapes in both .txt and .RLE formats, and the ability to open and view saved .RLE files.

## QUALIFICATIONS

- Typescript
- React
- React Native
- Node.js
- Python
- C#
- C
- PHP
- SQL
- NoSQL

## COURSES

MERN Stack, Udemy

- A comprehensive full-stack development course covering MongoDB, Express.js, React, and Node.js.
- In this course, I've submitted projects demonstrating my skills in building RESTful APIs, dynamic lists, and data fetching and rendering.
