ABOUT ME

With 2+ years in React development, I excel in front-end and am expanding my full-stack proficiency. Agile-focused, I prioritize UI/UX and contribute to seamless applications. I've built RESTful and GraphQL APIs. A team player with effective communication, I'm committed to advancing my full-stack skills for impactful contributions to development projects.

WORK EXPERIENCE

Frontend Developer　　　　　　　05.2022-Present
Altooro, Haifa - Startup

- Developed new user interfaces, fixed defects, and built stable and maintainable code bases using Next.js. Experienced in using Git for version control and testing and debugging code.
- Coded modular and responsive templates using modern CSS techniques and JavaScript libraries. Used **HTML, CSS, TypeScript, React, SWR, MaterialUI, and Styled components.**
- Implemented mobile-friendly pages that enhance the user experience and increase dwell time on the platform.
- Documented all the product components in Storybook.

Full Stack Developer　　　　　　01.2022 - 05.2022
Loop, Haifa

- Developed cross-platform phone app using React native, and Firebase.
- Created from scratch Phone number authentication, SMS invitation, Full Chat system, Search engine, Push notifications, and Task management.
- Project management, Keeping up with the weekly updates with the client, Time estimation, and Technical Services.

PROJECTS

Expenses Tracker　　URL Shortener　　NFT e-commerce

- The final diploma project is a wood storage program developed in C# & Access Database. It helps sort and track wood in the store by matching available storage to the wood that needs sorting.
